PROFESSIONAL SUMMARY

Product Designer with 3+ years designing B2B enterprise interfaces for complex, data-heavy operations -- CRM, supply chain, and omnichannel commerce spanning 3 countries. Sole UX designer across multiple production modules, owning discovery through GitHub handoff independently. Hands-on with Shadcn, Tailwind, and TypeScript in code, plus AI-native research workflows (Perplexity, LLMs, NotebookLM) documented as a published playbook.

CORE COMPETENCIES

High-Fidelity UI Design | Design Systems & Component Libraries | Figma (Advanced) | UX Research & Usability Testing | Interactive Prototyping | Design QA & Handoff

WORK EXPERIENCE

Cantu Inc **Nov 2024 - Present (1y 8m)**

Product Designer - Brazil

- **Design systems in code:** built a 12-component registry and global layout contract (Shadcn, Tailwind, Ant Design) before the first screen shipped on a new module -- zero rework needed when the module was extended later.
- **Nexus platform redesign:** consolidated 2 business models (wholesale + retail) and 3 countries (Brazil, US, Mexico) into a single account view -- replaced role-agnostic screens with role-aware actions and inline purchase-eligibility status.
- **FlowOps supply chain platform:** sole UX designer across 4 previously disconnected departments (supply planning, backorder monitoring, ERP integration, access management) -- shipped 10+ production releases in 2 months on a weekly cycle.
- **Feature readiness framework:** created a 14-dimension, 95-point readiness checklist adopted as the team's standard for "ready to build," replacing ad-hoc debate between PMs and engineering.
- **AI-native discovery:** introduced Perplexity, LLM, and NotebookLM workflows for research synthesis and competitive analysis -- the methodology became a published playbook.

Focus Monk **Sep 2023 - Nov 2024 (1y 3m)**

UX/UI Designer

- Designed end-to-end UX for a productivity application -- flows, information architecture, and visual system from scratch, working directly with the founding team.
- Delivered production-ready Figma components and interactive prototypes; responsible for research synthesis, interaction design, and usability testing.

Lize **Apr 2023 - Aug 2023 (5m)**

UX/UI Designer - Joinville, Brazil

- Contributed to a full redesign of Lize's web and mobile platform -- qualitative and quantitative research, A/B testing, and usability testing.
- Delivered redesigned flows for core user journeys, reducing onboarding friction and improving task completion across device types.

Career Transition

Nov 2021 - Mar 2023

Self-Directed UX/UI Training

- Transitioned from visual/art direction into product design through self-directed coursework in UX/UI fundamentals and advanced Figma workflows, building the foundation for the first UX/UI Designer role at Lize.

G'Seis Publicidade & Arroba Design

Sep 2020 - Oct 2021 (1y 2m)

Art Director - Balneario Camboriu, Brazil

- Visual identity creation; design principles (alignment, proximity, movement, space, balance). Tools: Photoshop, Illustrator, Premiere.

PROJECTS

Nexus & FlowOps (Enterprise B2B)

Consolidated CRM, supply chain, and omnichannel retail into a single operational layer for an enterprise client (3 countries, 4 departments). End-to-end: discovery, wireframes, high-fidelity UI, design system contribution, QA, and handoff. Result: 10+ production releases in 2 months; 95-point readiness framework adopted as team standard.

Figma, Shadcn, Tailwind, Ant Design - keyportfolio.vercel.app/cases/nexus

Tire Platform UX Diagnostic (B2C E-commerce)

Led UX research diagnosing checkout and product-discovery failures behind a <1% conversion rate on an O2O tire e-commerce platform. Identified 6 root causes across compatibility search, mobile experience (82% of traffic, 64% higher bounce vs. desktop), and post-purchase flow -- synthesizing 21 direct NPS verbatims and rage-click analysis into a 3-sprint remediation roadmap.

Behavioral analytics (Clarity), NPS analysis, JTBD - keyportfolio.vercel.app/cases/tire-platform

AI Discovery Playbook (AI Product Design)

Documented methodology combining Perplexity, LLMs, and NotebookLM for product discovery and competitive analysis. Published playbook supported by real product case studies from Cantu Inc.

Perplexity, NotebookLM, LLMs - keyportfolio.vercel.app

UI Scenario Generator - VS Code Extension (Technical / API)

Built a TypeScript VS Code extension that generates all possible UI scenarios for a system module from its business rules, powered by the Groq API (Llama 3.3). Full test suite with 13 tests. Demonstrates API/JSON technical depth.

TypeScript, Groq API, VS Code API, Jest

EDUCATION

MBA in UX Research, Research Operations and Design Leadership

2023 - 2024

Centro Universitario de Tecnologia de Curitiba - UNIFATEC

Bachelor's Degree, Advertising and Marketing

2015 - 2018

UNIASSELVI

SKILLS

Engineering: Shadcn/ui, Tailwind CSS, Ant Design, TypeScript, Next.js, APIs, JSON

AI: Claude API, Gemini API, Groq API, AI-native workflows, prompt engineering

Product: Agile, Scrum, Kanban, Cross-functional collaboration, Operational mapping

Languages: Portuguese (Native), English (Professional Working)
