PROFESSIONAL SUMMARY

3+ years designing enterprise B2B digital products -- high-fidelity interfaces, design systems, and operational UX for complex, data-heavy environments. At Cantu Inc, I design the operational layer connecting distributors, retailers, and logistics across Brazil's automotive market: CRM flows, supply chain, omnichannel commerce -- where visual consistency, accessibility, and usability directly shape business outcomes. I contribute to component libraries at implementation level (Shadcn, Tailwind, Ant Design in code), run Design QA before and after handoff, and build cross-functional frameworks that align product managers and engineers before solutions are committed. I also introduced AI-native workflows into product discovery -- the methodology became a published playbook. Technical differentials: hands-on with APIs, TypeScript, and JSON, which means I work with engineering, not just alongside it. Cases: [keyportfolio.vercel.app](#)

CORE COMPETENCIES

High-Fidelity UI Design

Design Systems & Component Libraries

Figma (Advanced)

UX Research & Usability Testing

Interactive Prototyping

Design QA & Handoff

B2B Enterprise SaaS

AI-native Product Design

WORK EXPERIENCE

Cantu Inc Nov 2024 - Present (1y 8m)

Product Designer · Brazil

- Design Systems in code:** contributed to component library built with Shadcn, Tailwind, and Ant Design -- translating design decisions into scalable, accessible patterns for complex, data-heavy interfaces across multiple product areas.
- Design QA & Handoff:** ran Design QA before and after engineering handoff to ensure visual consistency and specification adherence across CRM, supply chain, and omnichannel modules.
- Workflow design first:** mapped operational workflows end-to-end before defining interface structure -- redesigned critical CRM flows to surface the right information at decision points, reducing execution time for B2B sales teams.
- AI-native discovery:** introduced AI-native workflows into product discovery using Perplexity, LLMs, and NotebookLM for synthesis and pattern identification -- the methodology became a published playbook.
- Cross-functional alignment:** built decision frameworks for product managers, engineers, and operations leaders to evaluate trade-offs using a shared model before committing to solutions.

Focus Monk Sep 2023 - Nov 2024 (1y 3m)

UX/UI Designer

- Designed end-to-end UX for a productivity application -- flows, information architecture, and visual system from scratch, working directly with the founding team.
- Delivered production-ready Figma components and interactive prototypes; responsible for research synthesis, interaction design, and usability testing.

Lize Apr 2023 - Aug 2023 (5m)

UX/UI Designer · Joinville, Brazil

- Contributed to a full redesign of Lize's web and mobile platform -- qualitative and quantitative research, A/B testing, and usability testing.
- Delivered redesigned flows for core user journeys, reducing onboarding friction and improving task completion across device types.

G'Seis Publicidade & Arroba Design Sep 2020 - Oct 2021 (1y 2m)

Art Director · Balneario Camboriu, Brazil

- Visual identity creation; design principles (alignment, proximity, movement, space, balance). Tools: Photoshop, Illustrator, Premiere.

PROJECTS

VerumCenter & Verum Supply Chain Enterprise B2B

Designed the operational layer of an enterprise SaaS platform (Cantu Inc) consolidating CRM, supply chain, and omnichannel retail across 3 countries. End-to-end: research, wireframes, high-fidelity UI, design system contribution, QA, and handoff.
Figma · Shadcn · Tailwind · Ant Design · [keyportfolio.vercel.app](#)

AI Discovery Playbook AI Product Design

Documented methodology combining Perplexity, LLMs, and NotebookLM for product discovery and competitive analysis. Published playbook supported by real product case studies from Cantu Inc.
Perplexity · NotebookLM · LLMs · [keyportfolio.vercel.app](#)

UI Scenario Generator -- VS Code Extension Technical / API

Built a TypeScript VS Code extension that generates all possible UI scenarios for a system module from its business rules, powered by the Groq API (Llama 3.3). Full test suite with 13 tests. Demonstrates API/JSON technical depth.
TypeScript · Groq API · VS Code API · Jest

EDUCATION

MBA in UX Research, Research Operations and Design Leadership	2023 - 2024
Centro Universitario de Tecnologia de Curitiba - UNIFATEC	
Bachelor's Degree, Advertising and Marketing	2015 - 2018
UNIASSELVI	

CERTIFICATIONS

Agile Fundamentals: Including Scrum and Kanban	2022
Certification in UX, UI and Product Design	
Curso Completo de Figma - UX UI Design	

SKILLS

- Design:** Figma, High-Fidelity UI, Wireframing, Interactive Prototyping, Design QA, Design Systems, UX Research, Usability Testing, A/B Testing, Accessibility
- Engineering:** Shadcn/ui, Tailwind CSS, Ant Design, TypeScript, Next.js, APIs, JSON
- AI:** Claude API, Gemini API, Groq API, AI-native workflows, prompt engineering
- Product:** Agile, Scrum, Kanban, Cross-functional collaboration, Operational mapping
- Languages:** Portuguese (Native), English (Professional Working)
